SMART EARS Philosophy

- Children with Hearing loss around the world should have access to spoken language instruction
- Individuals **can** make a difference- one person trained means many children will learn to speak
- All deaf children should have an 'Equal Voice' to speak for themselves no matter where they are
- Parents can give their children an equal voice with training and guidance
- Where there is a will, there is a way to build a spoken language program that leads to high outcomes, even in remote and rural areas.
